

Methodological remarks, concepts, definitions

The scope of health services is included in the Act LXXXIII of 1997 on the benefits of the compulsory health insurance and the Government Order 217/1997 (XII.1.) regulating the implementation of this act.

This chapter presents the data of those concluded financing contract.

Financing contract: is concluded between the financing institute (NHIFA, Regional Offices of the National Health Insurance Fund) and the service provider for health service.

To define the indicators regarding financed services (per services, station), we count their average number per month.

Chapter 7.1. to 7.8.5. are containing date of service providers which concluded financing contract with NHIFA relating to the performance and financing of the period from 1 January to 31 December.

District nurse service, mother, child and youth care

Source of data: performance data of the district nurse services and school doctors that are forwarded to the National Health Insurance Funds Administration.

Territorial district nurse service: district nurse services provided on persons have address in provided territory by local government. Provided tasks are defined in the par 3 of Ministry of Health, Welfare and Family decree No. 49/2004.

Youth care: the district nurse is provided school medical care on 3-18 years old and over 18 years old full-time secondary education participant. (appendix 3 of decree No. 26/1997 (IX.3.).

Full time school doctor services: had to be hired whenever the number of student reached the 800 persons in the education institute.
